Date: 10/26/19

coord - Coordinates inside of the list for the x and the y values as storage
x - dependent value
y - independent value
Np - shorten for numpy
Plt - matplotlib to import
'Stop' - using if statements to stop adding values
data - another list containing the coord list
Sort - using a sort system to rearrange the x values in an orderly fashion
unknown - using the f(x) we created to predict the value based on the trendline
m/b: the varaible number in the function y = m*X+b
